- French

PASCAL NTIMBWA

JUNIOR FULL-STACK DEVELOPER

PROFILE

I am a junior fullstack developer with a background in Engineering. I enjoy the thrill of problem-solving and the creativity that coding allows. Furthermore, I have experience in backend development using Python and Django framework, and frontend development using HTML, CSS, and JavaScript. I can create, maintain, and update websites. I am also great with SQL (MySQL and PostgreSQL), and familiar with React. I am eager to contribute my skills and grow alongside a dynamic team. As a lifelong learner, I embrace challenges, stay updated with industry trends, and continually seek opportunities to expand my expertise.

WORK EXPERIENCE

Tutor at Vaal University of Technology

February 2019 - October 2022

- Supported students with AutoCAD to design and create 3D modellings.
- Taught mathematics and Engineering Drawing.
- Provided assistance using specific curriculum and materials.
- Worked closely with students on specific class struggles, closely reviewing materials and assignments to offer targeted help
